

Intel 471

SOLUTION HIGHLIGHTS

- Automatically aggregate breaking cybercriminal activity from numerous sources
- Access insights into advanced malware, ransomware, phishing, and malicious infrastructure
- Pivot, investigate, and enrich any observable with Intel 471's actor-centric intelligence
- Prioritize tracking of threat actors targeting your organization and industry
- Automate sharing of cybercriminal threat information into your security infrastructure
- Enact targeted alerting of cybercriminal activity within ThreatStream
- Disrupt or block attacks before they are carried out
- Subscribe to Intel 471's actor-centric intelligence via Anomali Trusted Circles

Intel 471 and ThreatStream Integration

Proactive Cybercriminal Intelligence

The threat landscape is continually expanding and organizations are under constant attack. Without actionable threat intelligence, these organizations lack the necessary context to visualize what threats lie on the horizon. Security teams need next-generation security solutions to help them respond faster, defend proactively, and protect efficiently.

Centralized Visibility into the Underground

The joint Anomali and Intel 471 offering provides a window into the elite cybercriminal underground within the Anomali ThreatStream platform. This centralized threat intelligence solution provides proactive and ground-breaking insights into top tier cybercriminals' methodology for targeting organizations, assets, and people. Using these products in tandem enables organizations to assess complex security threats, threat actors, exploits, malware, and vulnerabilities to make informed decisions. Ultimately, this joint offering allows security teams to automatically integrate threat intelligence into their internal security systems and prevent attacks before they occur.

BENEFITS OF ANOMALI

- Easy-to-use interface to view threat information received through STIX/TAXII feeds
- Analyze and correlate data into actionable information: SIEM rules, reports, and dashboards
- Pinpoint IOC's – quickly search for a specific indicator, search for an indicator type over a time range, and drill-down into details
- Eliminate unnecessary, duplicative and irrelevant indicators – before they enter your infrastructure
- Identify and prioritize the events that matter now – without DIY scripting
- Machine-to-Machine learning algorithms scale to accommodate thousands of IOCs per minute across your environment

BENEFITS OF INTEL 471

- Information reports from Intel 471's on the ground intelligence collectors
- Breaking insight into malware, ransomware, phishing and malicious infrastructure
- Proactive indicators of threat activity
- Prioritized tracking of threat actors targeting your organization and industry
- Ability to disrupt or block attacks before they are carried out
- Emergency threat briefings and regular customer calls

Benefits of the Joint Offering

Intel 471's rich, actor-centric threat intelligence offers insight into the elite cybercriminal underground. The Anomali ThreatStream platform provides a simple and effective method for collecting and operationalizing threat intelligence.

Seamless and Automated

Anomali ThreatStream automatically ingests Intel 471's premium threat data in real-time and displays this data in one central location. This saves security teams from the manual work of integrating threat intelligence into security systems.

Actor-Centric Intelligence

Joint customers are able to take advantage of Intel 471's actor-centric intelligence. The combined solution provides proactive and focused insight from a globally dispersed capability, fused with scalable automated collection systems.

About Anomali

The Anomali suite of threat intelligence solutions empowers organizations to detect, investigate and respond to active cybersecurity threats. The award-winning ThreatStream threat intelligence platform aggregates and optimizes millions of threat indicators, creating a "cyber no-fly list." Anomali integrates with internal infrastructure to identify new attacks, searches forensically over the past year to discover existing breaches, and enables security teams to quickly understand and contain threats. Anomali also offers STAXX, a free tool to collect and share threat intelligence, and provides a free, out of the box intelligence feed, Anomali Limo. About Intel 471

Intel 471 provides an actor-centric intelligence collection capability for the world's leading cyber threat intelligence teams. Our intelligence collection focuses on infiltrating and maintaining access to closed sources where threat actors collaborate, communicate and plan cyber attacks. We are active in places where entry is highly guarded such as underground marketplaces and other mediums where cybercriminals communicate. Our global teams are physically situated around the globe. We are in their homeland, we speak their language, we know their culture and we know how they operate. Our team is comprised of skilled and experience professionals from intelligence services, military, law enforcement and private threat intelligence companies. The mission of Intel 471 is to protect your organization, your products, your assets and your people. To learn more, visit www.Intel471.com.
